Assignment 5 -To Implement Timer-Based Periodic Tasks Using Software Timers

```
int led = 13;
unsigned long previousMillis = 0;
int interval = 1000;
int state = LOW;

void setup() {
  pinMode(led, OUTPUT);
}

void loop() {
  unsigned long currentMillis = millis();

  if (currentMillis - previousMillis >= interval) {
    previousMillis = currentMillis;

    state = !state;
    digitalWrite(led, state);
  }
}
```
