Assignment 7: To Measure Period and Frequency of an External Signal

```
const int signalPin = 2;

unsigned long period;
float frequency;

void setup() {
  Serial.begin(9600);
  pinMode(signalPin, INPUT);
}

void loop() {
  unsigned long t1 = pulseIn(signalPin, HIGH);
  unsigned long t2 = pulseIn(signalPin, LOW);

  period = t1 + t2;
  frequency = 1000000.0 / period;

  Serial.print("Period: ");
  Serial.print(period);
  Serial.println(" microseconds");

  Serial.print("Frequency: ");
  Serial.print(frequency);
  Serial.println(" Hz");

  delay(1000);
}
```
