Assignment 8: To Transmit and Receive a String Using UART with Interrupt-Based Reception

```
String receivedString = "";

void setup() {
  Serial.begin(9600);
  Serial.println("UART Communication Started");
}

void loop() {
  if (Serial.available()) {
    receivedString = Serial.readString();
    Serial.print("Received String: ");
    Serial.println(receivedString);
  }
}
```
